

Find 5 toys

Once you have found 5 toys can you put them in height order starting with the tallest and ending with the shortest.

Year 1

Learn by heart of the week:
Measurement

Choose 2 rooms in your house to measure the length of. Starting from one side of the room walk to the other side and count how many steps you walk. Compare the steps from both rooms. Which room did you get more steps from?

Who in your house is the tallest?

Can you put the people who live in your house in height order. Remember to include yourself.

Challenge

Look at the balance scales below.

Which statements are true?

- The car is heavier than the van.
- The van is heavier than the car.
- The car is lighter than the van.
- The van is lighter than the car.
- The car and van weigh the same amount.

Fill in the missing gaps

The _____ is heavier than the _____.
